

FLEXIBLE SOLUTIONS FOR INDUSTRIAL IT MANAGEMENT ON A PREMIUM SECURE PLATFORM

Ensure the connectivity, data processing, protection and monitoring of the operating status of your industrial plants via the combined solution from ondeso and secunet.

TARGETED MEASURES FOR OPTIMAL PROTECTION

Benefit from the symbiosis of targeted data analysis and active management of your devices. Trust in the customized protection of all your network segments with the help of the industrial platform of ondeso & secunet, which is completely „Made in Germany“. Secure your existing devices and brownfield systems so that you can continue to operate them securely and constantly in an almost completely networked world, thereby effectively reducing your attack surface(s). With the latest software and updates, as well as an always up-to-date inventory of your systems and a reliable backup & recovery solution, you will be able to reach a new level of OT security.

YOUR BENEFITS:

Take care of your OT components safely and reliably through technology „MADE IN GERMANY“

- ✓ 30 years of combined experience in IT security and industrial IT management
- ✓ Full access and transparency for your systems even in separate network areas
- ✓ For the brownfield: Integrate your existing systems seamlessly into your daily processes
- ✓ Detect faults, performance fluctuations and potential attacks on your systems early and reliably
- ✓ Simple and secure administration of OT components in your production environment or at customer sites
- ✓ For the greenfield: Integrate state-of-the-art security and management capabilities into your systems - even retroactively

ondeso is a German-based, globally active company, which was founded in 2010 in Regensburg and has meanwhile established further locations in Frankfurt am Main and Dormagen.

The product portfolio ranges from ondeso SR, which offers asset management, software deployment, endpoint management, disaster recovery, outage tracking and network management to consulting and implementation of concrete customer projects in the industrial environment. Furthermore, ondeso DC ensures a safe use of USB storage devices and limits their use to specified devices. ondeso HM offers you the possibility to monitor the vital signs of your computer components and to perform necessary maintenance in the next possible maintenance window. The ondeso HM is designed to serve both plant operators and machine and plant manufacturers (OEMs) and to meet their specific needs. Companies from various branches of industry such as manufacturing and production, process industry, automation and process control technology, providers and many more already rely on ondeso solutions.
